COMPANY PROFILE

VANDER
GEO LABORATORY

- ENVIRONMENTAL & GEOTECHNICAL -
TESTING SOLUTION

ABOUT US

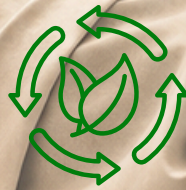

Vander Geo Laboratory is an integrated Laboratory subsidiary of VanderTech Resources, Specialist in Environment Testing and Geotechnical Testing.

We Deliver Accurate, Reliable and timely testing services to support compliance, engineering design and operating decision making across various industries

PRECISION

Accurate Data for Better Decision

SUSTAINABILITY

Committed to Environment

RELIABILITY

Trusted Partner you can Count On

WHY CHOOSE US?

- ✓ Integrated End-to-End Solution
- ✓ High Accuracy & Reliable Data
- ✓ Advanced Equipment & Technology
- ✓ Experienced & Competent Team
- ✓ Fast, Efficient & On-Time Service
- ✓ Strong Engineering Support
- ✓ Backed by VanderTech Resources

INTEGRATED MINING SOLUTION

VISION

To become a trusted partner in geotechnical consulting, construction, and environmental analysis by implementing innovation and technology to support productive operational activities and sustainable customer growth.

MISSION

1. Continuously enhance employees' competencies, dedication, and expertise in their respective fields.
2. Broaden insights and knowledge related to mining, construction, and environmental management in order to provide valuable recommendations and solutions for customers.
3. Develop a visionary mindset to deliver innovative and integrated technology-based solutions in overcoming various challenges alongside customers.
4. Commit to understanding partners' and customers' needs by providing appropriate attention and support.
5. Establish strong strategic partnerships with customers to build trust and foster sustainable growth.

OUR BUSINESS AREAS

ENVIRONMENTAL LABORATORY

- Water Testing
(Quality Analysis)
- Air Testing
(Ambient Air Quality)
- Emission Testing
(Stack & Sources Emission)
- Hygiene Industry
(Industrial Testing)

GEOTECHNOCAL LABORATORY

- Basic Soil Properties
- Strength Testing
(UCS, Direct Shear, Triaxial Test)
- Civil Testing
(Aggregate Analysis, Concrete Compressive Strength Test, Los Angeles Abrasion)

"Integrated Environmental & Geotechnical Laboratory with Global Standard Precision and Reliability."

ENVIRONMENTAL LABORATORY

Environmental Testing for Compliance and Sustainability

Water Testing

Physical, Chemical and Microbiological analysis for surface water, ground water, wastewater and void water

Air Testing

Ambient Air Quality monitoring for industrial, residential and environmental impact assessment

Emission Testing

Stack & sources emission testing to ensure compliance with regulatory standards

Industrial Hygiene

Noise Measurement, Lighting Measurement, Heat Stress/Work Climate Measurement, Vibration Measurement, Radiation Measurement.

GEOTECHNICAL LABORATORY

Comprehensive Geotechnical Testing to Support Your Project

Basic Soil Properties (Physical Properties)

Moisture Content, Specific Gravity, Atterberg Limits, Grain Size Analysis, Unit Weight/Density for Soil Classification and Preliminary Engineering Analysis

Strength Testing (Mechanical Properties)

Unconfined Compressive Strength, Direct Shear Test, Triaxial Test (CU, UU, CC) for Slope Stability and Foundation Design

Civil Testing

Aggregate Analysis, Concrete Compressive Strength Test, Los Angeles Abrasion Test for Design your Building
